All grades listed in catalog pertain to grade of child in 2014 - 2015 school year. There will be updates to this catalog, please check www.dcds.edu/summerprograms for any additions or changes.
Advanced Composition is a course designed for academically able 7th and 8th graders as well as students in grades 9-12 who want to reinforce their reading and writing skills, build their vocabulary level, and understand and apply grammar rules to their writing. Students will read and analyze a short story every day, learn 100 vocabulary words a week, write creative and analytical papers. Assessments are given daily. Students can take the course for credit to improve their previous English GPA or to just learn to read and write with more skill. An English notebook and exam at the end of the course are required.

Algebra I

This course is designed to provide the student with a strong foundation for subsequent secondary mathematics courses. Course content includes the properties of the real number system, equation solving, operations with polynomials and rational expressions, factoring polynomials, graphing linear and quadratic equations and inequalities, working with functions, solving systems of equations, and operations with matrices. Students can take the course for credit to improve their previous Algebra I GPA or for enhancement for course work in the fall.

Instructor: TBD
Program Contact: John Williams at jwilliams@dcds.edu or (248) 430-1071

Algebra II

This second year algebra course contains review of Algebra I and an introduction of concepts necessary for successful Precalculus and Calculus studies. Course content is approached through problem-solving, geometric and graphical interpretations. Topics include manipulations of real numbers, solving equations and inequalities, graphing and solving systems of equations, simplifying polynomials and rational expressions, transformations of relations and functions, solving exponential and logarithmic equations. Sequences and series, permutations, combinations and probability are introduced in this course. Students can take the course for credit to improve their previous Algebra II (Honors or Regular) GPA or for enhancement for the course in the fall.

Instructor: Lara Klosinski
Program Contact: John Williams at jwilliams@dcds.edu or (248) 430-1071

American Government

This course examines the constitutional underpinning and functioning of the American government. Political beliefs and behavior, political party formation, campaigning and voter turnout are explored. The impact of special interests and the mass media follow the key components of the national government: the President, Congress and courts are investigated in depth. Special attention is given to local and state government and issues. Investigative readings and web assignments cover such topics as third parties, voter turnout, campaign spending, interest groups and US Supreme Court cases.

Instructor: Don Corwin
Program Contact: Don Corwin at dcorwin@dcds.edu or (248) 430-1685
Art & Design is an introductory art course that is a prerequisite for many Upper School art classes. The course covers a variety of artistic mediums, and gives students a foundation for further art study. Credit in fine or performing arts is required at the Upper School, and this course provides .5 of fine arts credit towards graduation.

Instructor: TBD
Program Contact: Tim Bearden at tbearden@dcds.edu or (248) 430-3696

Calculus

The course is intended to strengthen the student’s understanding of secondary mathematics, to increase the student’s capability of working with mathematical expressions, and understand the basic concepts of calculus using the graphics calculator and available technology. Topics studied are: analytical geometry, limits, curve sketching, differentiation and its applications, the integral and its applications, composite functions, transcendental functions, and basic integration techniques. Students can take the course for credit to improve their previous Calculus (AB/BC) GPA or for enhancement to gain knowledge for the course in the fall.

Instructor: TBD
Program Contact: John Williams at jwilliams@dcds.edu or (248) 430-1071

Geometry

This course integrates topics from geometry and algebra and includes an introduction to space geometry, coordinate geometry, vectors, and constructions. The emphasis is on the development of logical and sequential reasoning within the structure of a geometric system, and the development of the basic postulates and theorems of Euclidean Geometry. Students study concepts of formal proof, congruence, similarity, indirect proof, ratio and proportions, quadrilaterals and polygons, circle and angle relationships, areas and perimeter of polygons, and volumes and surface area of solids. Students can take the course for credit to improve their previous Geometry GPA or for enhancement to gain knowledge for the course in the fall.

Instructor: Jim DeSantis
Program Contact: John Williams at jwilliams@dcds.edu or (248) 430-1071

Health

Health is a required course for graduation, and this summer course satisfies that requirement. Health course covers topics including nutrition, substance abuse, human sexuality, relationships, lifesaving and CPR. Students will leave the course certified in CPR.

Instructor: TBD
Program Contact: Tim Bearden at tbearden@dcds.edu or (248) 430-3696
An individualized mathematics program is designed for each student based on diagnostic test results. Emphasis is placed on identifiable variables.

Instructor: TBD
Program Contact: Glen Shilling at gshilling@dcds.edu or (248) 430-3549

Pre Calculus

This course is intended for those students who would like to strengthen their secondary mathematics background and for those students who are planning to study calculus in the future. Topics from Algebra II are reviewed and studied in greater depth and an emphasis is placed on graphing functions and exploring the behavior of functions using a graphics calculator. Real-world problem situations are used as the means to approach and teach concepts and skills. Topics studied include polynomial functions, circular and trigonometric functions, graphs of trigonometric functions and their inverses, analytical trigonometry, exponential and logarithmic functions, solving a system of equations, sequences/series, combinatorics and probability. Students can take the course for credit to improve their previous Pre Calculus GPA (Honors/IB/Reg) or for enhancement for the course in the fall.

Instructor: John Meyers
Program Contact: John Williams at jwilliams@dcds.edu or (248) 430-1071

Public Speaking / Speech

This 9th grade Speech / Public Speaking course satisfies the DCDS Upper School graduation requirement for speech. Emphasis is on public speaking, research, presentation, and speech techniques.

Study Skills

Effective study skills are essential for academic progress. Productive study habits, attitudes and skills distinguish a good student from a poor student. The Study Skills Program is designed to develop and improve the English and mathematics skills and habits of good, average, and below average students. This is our 45th summer of offering quality instruction in study skills.

Learning "how to learn" is one of the most important skills a student can achieve throughout his/her school experience. This two day back-to-school program is designed to help students build confidence and think strategically about their learning styles. Students will set goals for a positive start to ninth grade as they inventory their individual strengths and learn to "think like a teacher." Students will try out various study strategies, design a system of organization for their ninth grade year, organize the file folders in their computer and create study guide templates.

All materials and an original set of supplies will be provided as part of the cost and will remain the property of the student. Students are encouraged to bring their laptops if that is how they intend to take notes in school. To help personalize instruction, there will be a short learning styles questionnaire to be completed prior to class. Also, please note that if the student is involved in a fall sport, we designed the program so that only one day of practice would be missed (hence the reason this is offered on Friday and Saturday). Coaches should understand one absence prior to school starting.

9:00 AM - 3:00 PM • Full Day

Dance and read this summer with Ballet and Books Camp! Learn beginning ballet techniques that will improve coordination, flexibility and muscle strength. Each day we will complete barre and center work as well as learn a dance to perform at the end of the week. We will read books related to ballet each day, such as "Angelina Ballerina" and "Best Friends Wear Pink Tutus." We will focus on our reading comprehension skills by creating a craft that relates to the story. No dance experience needed. Children are welcome to wear their ballet clothing, but it is not necessary. They just need to wear something they can move in freely. Please bring a peanut-free snack, a peanut-free lunch, a towel, bathing suit, and sunscreen every day to camp. Before Care and After Care are available. You must register for them separately.

**Intro. Video Game Creation**

**Thirteen Mile Campus**

**Program Fee:** $315

**Grades:** 2 - 9, 9:00 AM - 4:00 PM

Starting with basic commands, campers will be taught in a step-by-step progression how to build a game that they design. Camp begins with an introduction to Game Maker software including adding rooms, building walls, adding backgrounds, warping to new levels, music, sound effects and many other great techniques. The first few days focus on programming basics and by late week the children are well on their way to creating their own unique game. At the end of camp each child is provided access to our custom download site. From this site they can download Game Maker LITE software, their games, our custom walk through guide and resource folder. While the game that is created at camp can be played at camp, in order to play the game at home, a license ($40 from yoyo games) is required. Discounted licenses may be available from your camp director. Once Game Maker software is downloaded, campers can continue to develop their game and create new ones as well. Campers will also receive t-shirts, trophies and a certificate of participation. REGISTRATION FOR THIS CAMP AT www.activelearningcamps.com

**Kodu Video Game Creation**

**Thirteen Mile Campus**

**Program Fee:** $315

**Grades:** 1 - 6, 9:00 AM - 4:00 PM

Children as young as 7 years old can build their very own video game. Kodu, designed by a team from Microsoft is an easy to learn and fun way to create a unique video game. At our Active Learning Kodu video game creation camp, children 7-12 will learn to create a unique game using a curriculum created by Active Learning. In a step by step progression, characters are directed to move, collect bonus objects, defeat enemies and complete tasks to dominate the game. Kids design their own worlds and then will program their characters, create health, scoring, spawning characters and other cool features of their favorite games. At the end of the camp, if they bring a flash drive, they can take their game home with them to continue to create, or play. REGISTRATION FOR THIS CAMP AT www.activelearningcamps.com

Taking the Stage

06/23/2014 - 06/27/2014
Grades 6 - 8, 12:40 PM - 4:00 PM

Acting is a craft not unlike any other craft - it can be taught, practiced and perfected. In Taking the Stage, we do just that. Utilizing improvisational games, scripted materials and confidence-building exercises, experienced actor and Upper School theatre director Brett Salamin will help to take your child to the next level of performance. Whether you're hoping for a part in the next big musical or just more confidence in the classroom, this camp will expose your child to techniques and exercises that will improve their performance on and off the stage.

Instructor: Brett Salamin
Program Contact: Brett Salamin at brsalamin@dcds.edu or (810) 599-5717

The Character Within

06/23/2014 - 06/27/2014
Grades 2 - 5, 8:30 AM - 12:00 AM

Building confidence is one of the pillars to success in the classroom. Working with experienced actor and Upper School theatre director, Brett Salamin, your child will not only gain confidence, but will also be given the tools necessary to begin his/her journey on stage. Whether your child has no experience or has already graced the community stage, this program will enhance his/her skills and provide a fun and engaging experience.
