

Introduction to Jewelry and Metals

6/18/18 – 7/13/18

Grades 8 -12 (Ages 12 – 19)

Thirteen Mile Campus

\$725

The introduction to Jewelry and Metals class gives students an introduction to techniques working with various metals in order to fabricate jewelry. Students will learn to design using the 3D printer, and create finished pieces with attention to form and design. This course is for credit and requires Foundations of Art or a year of middle school art as a prerequisite.

School closed July 4.
